

Evaluation for Certification Options

ITSqc, LLC provides the following options for organization undergoing an Evaluation for Certification based on the eSourcing Capability Models.

<u>Type of Evaluation</u>	<u>Fee</u>
<i>Full Evaluation (all Model Practices) with remote observation</i> by a Senior ITSqc representative, determination by the certification board, issuance of the certificate, and posting on the ITSqc website	\$15,000.
<i>Full Evaluation (all Model Practices) with partial onsite and partial remote observation</i> by a Senior ITSqc representative, evidence review and decision by the certification board, issuance of the certificate, and posting on the ITSqc website – includes business class travel to the location(s) where the Evaluation is held and daily fee of USD\$2,000. for observer (typically for five days duration or USD\$10,000.)	\$15,000 plus travel plus daily fee
<i>Evaluation of Capability Area(s) or Capability Levels – (partial Number of Model Practices)</i> with remote observation by a Senior ITSqc representative, determination by the certification board, issuance of the certificate, and posting on the ITSqc website	\$10,000.
<i>Audit – NEW</i> – an ISO type examination of evidence by two Auditors who are Authorized Lead Evaluators. Duration and pricing will depend on the scope of the Model and span of the involved organization. This option will be available by Fall, 2011.	

Self Appraisal Options

Full or partial self-appraisals may be conducted by Authorized Lead Evaluators and the pricing for these events is determined by the participating organization and the Lead Evaluator.

In the event that ITSqc is involved to mentor and observe professionals who are preparing to become Authorized Evaluators or Authorized Lead Evaluators, fees to ITSqc, LLC are for business class travel and a daily fee of USD\$2000.

Participatory Workshop Appraisal – NEW – ITSqc will offer this option by Fall, 2011. Pricing will be determined by participating the organization and Lead Evaluator. It is expected that this will involve approximately two days of on-site effort and will provide a launching point for improvement efforts at a significantly lower cost than other appraisal options.
